

## User Interface FAQs

▼ **The desktop GUI – is that just Windows PC based?**

No, netPrefect is multi-platform and that doesn't just mean the server components. The GUI can be installed on a wide variety of platforms, including some of the leading Unix variants, as well as Microsoft Windows.

▼ **Does it run on Windows mobile?**

No, netPrefect doesn't have a Windows mobile user interface. However, notifications of alerts can be sent to a Windows mobile device using email.

▼ **Can I group my systems together in the GUI?**

Yes, new "nodes" can be created in the tree that is displayed by the GUI. Managed resources can then be "dragged" into the new nodes to create a different hierarchy. This technique can be used to display devices by their business function.
